

The Critter Committee
M'Finda Kalunga Garden

Invites you to our gala

LADY BUG RELEASE!

A Free Event for Parents and
Children

Sunday, June 12

1-3pm

Childrens games & activities

RAIN OR SHINE!

Ladybugs love to eat aphids, a harmful plant pest. They are cute. They are beautiful. We want to help populate New York City with them.

WATCH OUT, APHIDS!

Join us when we release a whole bunch of them into the garden. And wish them well. Crickets and praying mantis could be next.

Entrance to the garden at Rivington Street between
Chrystie and Forsyth

Sponsored by a grant from the Entomology
Department of Cornell University and the MKGarden
"Critter Committee"
